

May 26, 1988

TO: File
FROM: Frank Filas, Reclamation Engineer
RE: Site Inspection, M/023/007, North Lilly, Juab County, Utah

On May 17, 1988, Holland Shepherd and I stopped briefly at the North Lilly Project. A large building has been built at the site, and the pads and ponds are in the process of being constructed. A black rock is being hauled in, crushed, and laid down for use as leak detection.

Judging by the rapid development to date, this project should soon be in operation.

Note: The D.O.E. filed by North Lilly several years ago was for the partially constructed building at the top of the hill (above the old mill site). It is not included in the current mine and reclamation plan.
